

IPOWER LITE INTELLIGENT PDU

SETTING NEW STANDARDS IN DATA CENTRE MANAGEMENT

PRODUCT OVERVIEW

iPower Lite is an entry level intelligent PDU for reporting on power, temperature & humidity.

It has a built in web server and full remote monitoring over SNMP. With a wide range of input and outlet options, up to a maximum of 48 outlets can be monitored and will work on circuits up to 32A. The precision energy meter provides readings over single, dual or three phases to 1% accuracy for:

- Peak Amps
 - Peak Volts
 - Volts AC
 - Amps AC
 - VA
 - Frequency
 - Watts
 - Power Factor
 - Internal Temperature
 - kWh
- iPower Lite is a new generation of intelligent PDU with in-built powerful analytical tools that puts you in control of your power and environmental measurements.
 - iPower Lite has an easy-to-use HTML interface with the ability to set SMS and Email alarms for all critical parameters.
 - iPower Lite can be configured as a Primary device, with the ability to control an additional 31 Secondary PDU's, from a single IP address.
 - iPower Lite will work in conjunction with other iPower units to create a fully flexible monitoring system allowing for individual racks to have measurement only, or measurement and switching capabilities.

Features

- Variable build configuration for UK/European/IEC outlets.
- Overall 1% accuracy power monitoring.
- Temperature and Humidity sensor ports.
- Single phase metering at up to 32A.
- IEEE 802.3 with full 10/100Base-T network compatibility
- HTTP, SNMP v2, Telnet, XML
- High-speed MODBUS RS485 for chaining up to 31 PDU's.
- Fixed or remote mounted 16x2 LCD backlit display with RGB.

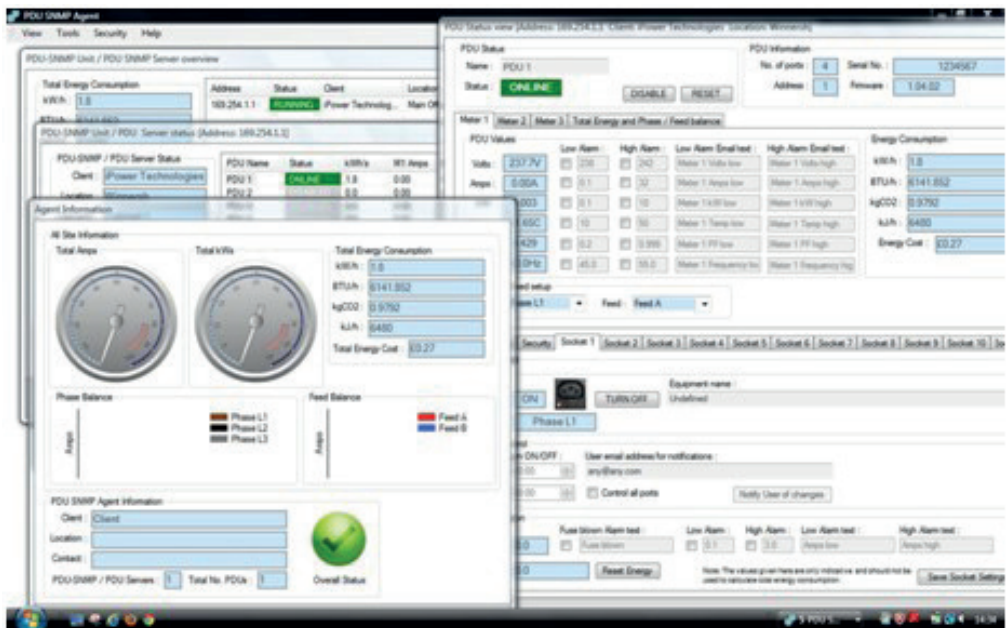

iPower Lite Supports:

Supports a range of external features that further enhance its capabilities, making it a powerful entry level device for overall power and environmental monitoring.

- Single humidity/temperature sensor.
- A bus of up to 8 temperature only sensors.
- Optional to for remote mounted RGB display that can mount externally to rack.

PDU Agent™ Management Software

Consolidate All Your Readings With PDU Agent.

Collate and produce reports on all your readings. PDU Agent is an entry level management platform with easy to use dashboard layout that lets you log measurements and events from up to 1,000 iPower PDUs, for historical evaluation and to collate and produce accurate billing information.
