

## IT Security Cage

### Physical Protection For High Value IT Assets

EDP Europe designs & installs bespoke IT Security Cage solutions.

From simple wire mesh cages to our vented steel panel security cages, our caging solutions are custom designed to meet our clients' exact requirements.

- IT Security Cages provide visual and physical security to IT assets.
- Bespoke design enables cages to fit virtually any area.
- No project too big or too small.
- Cages can be produced from 50x50mm mesh, solid or vented panels.
- Multiple locking options including standard barrel locks, electronic or manual combination locks, with emergency push bar for swing doors.
- Enhance security further with the inclusion of an access control system with access via keypad, swipe card or biometrics.
- Self-supporting modular design with a choice of sliding or swing doors.
- Tamper proof design with no access to screws or hinges from outside the cage.
- Below raised floor security also available.
- Vented roof sections also available for a fully enclosed cage solution.
- Available in a wide choice of colours with options for corporate branding.
- Manufactured in the UK
