

EziBlank Panels & Barriers

Airflow Management Solutions For Racks & Cabinet-Rows

Sealing unwanted gaps in IT racks and cabinet-rows is vital as part of an effective airflow management strategy.

EziBlank offer a range of panels and barriers that help enable these improvements.

- Sealing unused rack space and gaps within a row of cabinets prevents hot exhaust air circulating back to the front of racks.
- EziBlank 19" blanking panels are supplied as 6U blanking panel sheets that can be snapped to the required size.
- EziBlanks 19" 6U blanking panel sheets are available in three colours: Black, Grey or White.
- EziBlank 6U panels are easy to install without any tools or fixings.
- Similar solutions available for use in 21" and 23" racks.
- 1U Brushstrip panels are also available to seal rack openings where cables need to pass from the front to the back of a rack.
- EziBlank Wall is a free-standing rack replacement panel that can be used to seal gaps in cabinet-rows when a rack is missing or removed.
- Rotating the panel enables it to replace 600mm, 750mm or 800mm wide racks.
